WORLD-CLASS, WORLD-WIDE

 **HEXADYNE**
CORPORATION

TO FACILITATE DEFENSE COOPERATION BETWEEN THE U.S. AND ITS ALLIES BY ASSISTING FOREIGN COUNTRIES IN THE REPAIR, SPARING, AND UPGRADE OF THEIR MISSILE DEFENSES.

HEXADYNE Corporation has spent years building and streamlining the requisite logistic and supply chains to service Air Defense initiatives worldwide. At HEXADYNE, it is a point of pride that our timely and cost effective provision of parts, components, and subsystems has added to the operational readiness of these missile defense systems. Many of our senior staff members have extensive technical, programmatic, and operational experience with air-to-air and surface-to-air systems including Standard Missile (SM1, SM2), Patriot PAC2/3 and I-HAWK systems. We bring experience and commitment to bear every day in our supply support role.

The sales and export of missile defense items is, of necessity, a sensitive matter, monitored and strictly controlled under State Department and MTCR guidelines. HEXADYNE export and ITAR experts constantly review existing policies and practices governing technology sharing and defense cooperation. Our staff stands ready to provide the necessary licensing and export control assistance to eliminate risk and avoid any impediments to international trade in these critical defense commodities.
